

# Potential Wind Capacity at 140-Meters Hub Height

35% or Higher  
Gross Capacity Factor

Near-Future Turbine  
Technology Reflective of  
Turbines in Development

Maryland

*This map was produced by the  
National Renewable Energy Laboratory  
for the Department of Energy,  
February 2015*

This map illustrates general wind resource potential only and is not suitable as a siting tool. More detailed site and wind speed data, as well as coordination with relevant authorities, are needed to thoroughly evaluate appropriate wind energy development at any given location. *Data sources: AWS Truepower, National Renewable Energy Laboratory*
